SUMMARY

Product Designer with 3+ years of experience in human-centered interaction design, from a two-sided marketplace recognized at the Startup World Cup to enterprise HRMS and mobility products. Fluent in AI-augmented design workflows and rapid functional prototyping. OPT-eligible and completing an MA in Human Experience Design Interaction at CSULB (May 2026).

EXPERIENCE

Product Designer

Nov 2021 – Mar 2024

Beehive Technologies • Kathmandu, Nepal

- Designed a full-scope HRMS from the ground up — attendance, leave management, project tracking, and employee profiles — enabling the company to replace a third-party HR platform entirely.
- Redesigned Easy Taxi's ridesharing app for both driver and passenger flows, addressing drop-off points in the booking journey through usability testing and iterative prototyping — reducing friction in the core dispatch-to-confirmation path.
- Built Beehive's first in-house design system for web — a component library and visual language adopted across cross-functional teams — reducing inconsistencies and cutting handoff time between design and engineering.
- Led end-to-end interaction design for Jump Nations — a sports platform spanning merchandise, activity bookings, and training content — from concept to launch, covering IA, design system, and accessible UI across three user journeys.

User Experience Designer

Jul 2021 – Oct 2021

Audio Bee • Santa Clara, CA

- Designed a voice-first search engine for hands-free accessibility — defining the interaction model and producing user flows, wireframes, and high-fidelity prototypes across mobile and desktop.

UI Designer

Jan 2020 – Jan 2021

Bigfoot Infotech • Kathmandu, Nepal

- Led end-to-end design of Inksvilla — a two-sided tattoo marketplace for discovery, booking, and purchase — from research through launch, covering dual user flows for clients and studios. Recognized at the Startup World Cup.
- Produced digital marketing assets and brand collateral for multiple clients — social ads, banners, and campaign visuals in Adobe Suite.

FREELANCE PROJECTS

- Khabar (News Platform): Designed from concept to launch — defining IA, content hierarchy, and visual language for editorial browsing across categories.
- TBD — The Building Decision (Education Platform): Designed from ideation, connecting learners with institutions through intent-based browsing and comparison flows.

CORE SKILLS

Design: Interaction Design, Wireframing & Prototyping, Design Systems, Information Architecture, User Flows, User Interface, Visual Design, User Journey Mapping, WCAG Standards, Storyboarding

Research: User Interviews, Surveys, Personas, Competitive Analysis, Usability Testing, Affinity Mapping

Design Tools: Figma, Adobe Suite, Protopie, Miro, Lucidchart, Google Stitch, Cursor, Antigravity

AI Workflow: ChatGPT, Gemini, Claude — research synthesis, content strategy, design critique; Prompt Engineering

Programming & Prototyping: HTML5, CSS3, AI-assisted front-end development (Cursor), functional prototype generation

Project Management: Agile, Jira, Zoho, Monday, Slack, MS Teams, Notion

EDUCATION

MA Human Experience Design Interaction — California State University Long Beach, California, USA

Aug 2024 – Dec 2026

BS in Computer Science and Information Technology — St. Xavier's College, Kathmandu, Nepal

Oct 2017 – Sep 2021

CERTIFICATIONS

UI/UX Design Specialization – California Institute of the Arts

Design Thinking for Innovation – University of Virginia
